Believe the Unbelievable!™

IMPROVE HEALTH AND VIGOR, EXTEND GROWING SEASON

Combined with any current crop treatment, our adjuvants have been proven to be a powerful tool for increasing your overall production by decreasing transpiration up to 50%, extending your growing season, and overall improving the health and vigor of your plants. Our products can be applied to all crops including, fruits and vegetables, field and row crops, turf, fruit trees, nut trees, ornamental trees, vines, shrubs, and flowers, and containerized plants.

O1-YS™ - THE Organic Adjuvant

OII-YS™ - THE Natural Adjuvant

O1-YS™ and OII-YS™ are uniquely formulated all natural adjuvants proven to greatly increase the efficacy of nematicides, fungicides, fertilizers, herbicides, insecticides, and nutritional sprays.

****NEW****

For Critical or Spot Treatments,

Use the SUPREME Concentrated Formula!

ENHANCER™ 1 - The SUPREME Organic Adjuvant

ENHANCER™ 2 - The SUPREME Natural Adjuvant

Benefits:

- **Concentrated and INTENSE chitosan-based formula**
- **EXTREMELY LOW USAGE RATE**
- **Apply at ANYTIME in the Growing Season**

NEMASAN

Nematode Suppression / Control

Nemasan is an Environmental Protection Agency (EPA) registered nematicide that can both be applied during all phases of the growing cycle and assist farmers in treating nematode outbreaks without using any special spray protocol, respirator or personal protective equipment (PPE).

**Year-round application,
a naturally made product,
and low application cost compared
to other compounds!**

Product must be adjusted to a pH of 5.0 or below in the final tank mix before adding O1-YS™, OII-YS™, ENHANCER™ 1, ENHANCER™ 2 or NEMASAN products.

CitriSan™ - Citric Acid

Use CitriSan™ to lower spray solutions to pH 5.0 OR below for maximizing the efficiency of Organisan products in all your Nematicide, Fungicide, Fertilizer, Herbicide, Insecticide, and Nutritional Sprays.

Made in U.S.A.

Our products are proudly made in
Lafayette, LA by the O2YS Corp.
